

**LEPRINO FOODS COMPANY
GLOBAL RESPONSIBILITY
TRUE TO OUR CORE**

VISION: Growing stakeholder value through global responsibility consistent with our core values

In simple terms, Global Responsibility (GR) is a platform that formalizes our commitment to doing things the right way. It stems from our core values of quality, service, competitive price and ethics, guiding everything we do. Our GR strategy encompasses five categories with priority areas of focus that address the economic, environmental and social aspects of our operations and the main interests of our key stakeholders.

ENVIRONMENTAL RESPONSIBILITY

PRODUCT RESPONSIBILITY

SUPPLY CHAIN RESPONSIBILITY

OUR PEOPLE

OUR COMMUNITIES

Our commitment to comply with regulations and use natural resources responsibly. Areas of Focus: Environmental Compliance, Energy, Greenhouse Gas Emissions and Water

TURNING AMBITIONS INTO ACTION: LEPRINO FOODS UNVEILS TRAIL MAP TO CARBON NEUTRALITY BY 2050

On Earth Day 2021, we announced our Climate Action commitment, which establishes our Trail Map to achieving carbon neutrality by 2050 and solidifies our pledge to be responsible water stewards. This commitment resulted from a strategic planning process, which was led by a cross-functional team. The members worked diligently to evaluate and identify concrete steps we can take to address our company's and the dairy industry's impact on the climate and vice versa.

OUR 2030 GOALS INCLUDE:

- **Reduce absolute emissions from scope 1 and 2 (direct operations) by 30%**
- **Reduce emission intensity by 30% for our milk and non-milk suppliers**
- **Reduce water intensity by 20% in gallons of water per 1000 pounds of milk**

Since our targets align with those of the U.S. dairy industry, we are confident that we will make progress in sync with our suppliers, industry partners and peers. Additionally, collaborations with our milk suppliers and our transportation and packaging partners will enable us to develop solutions to address shared objectives. These efforts build on previous investments in a combined heat and power system and biogas digesters, which have already contributed to significant reductions. The next page further illustrates the various initiatives we plan to undertake to achieve our goals.

At Leprino Foods, our core value of ethics drives our accountability as a corporate citizen. We believe that our company, along with the dairy community, has a crucial role to play in reducing our impacts on the environment and promoting sustainable food systems. Our Climate Action Trail Map provides a comprehensive approach to turn our ambitions into action.

In 2021, we began work on a 10-megawatt solar project on 13 acres at one of our facilities in Lemoore, Calif. The electricity will contribute approximately 10% of the plant's annual energy needs.

Leprino Foods Company Climate Action Trail Map to carbon neutrality by 2050

LEPRINO FOODS CARBON FOOTPRINT

INDIRECT CONTROL

Scope 3 emissions contribute 94.8% of our total carbon footprint.

SCOPE 3 EMISSIONS include all sources outside of our scope 1 and 2 boundary, i.e., those that occur both upstream and downstream of our activities.

DIRECT CONTROL

Scope 1 and 2 emissions contribute 5.2% of our total carbon footprint.

SCOPE 2 EMISSIONS are associated with the electricity we purchase.

SCOPE 1 EMISSIONS are from the fuel use at our facilities and in our owned fleet.
